

CLEAN REFRESHING CONVENIENT DRINKING WATER

With an AquaKinetic A200 Drinking Water System you benefit from:

- Clean, refreshing, filtered water that you can use for drinking and cooking.
- Elimination of the mess, inconvenience and expense of bottled water, pour-through pitchers and faucet-mounted filters.
- Small, convenient system that can be installed under your sink or in your basement.
- Options to deliver water to your refrigerator ice maker and water dispenser.

A200 5-stage process:

- High-capacity prefilter
- Reverse osmosis membrane
- Storage tank
- Carbon postfilter
- Lead-free faucet

A200 System features:

- Quick-disconnect filter cartridges make filter changes easy and sanitary.
- High-performance reverse osmosis membrane produces higher-quality water at a faster rate, so the water is ready when you need it.
- Automatic shutoff conserves water by shutting off the system when the storage tank is full.
- Space-saving design offers a variety of installation options.
- Quality construction and advanced technology.

Independent Laboratory Certification

The A200 Drinking Water System is tested and certified by WQA against NSF/ANSI Standard 42 and 58 for the reduction of claims specified on the Performance Data Sheet. Also conforms to CSA Standard B483.1 - Drinking Water Treatment Systems (Refer to the Performance Data Sheet for individual contaminants and reduction performance).
